DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-13 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

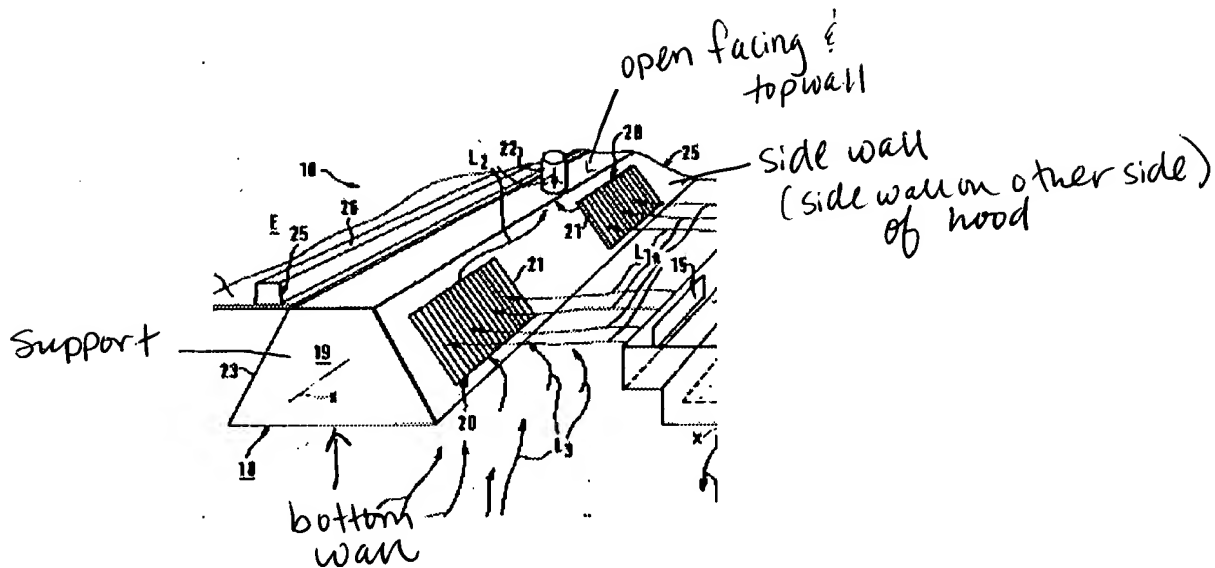

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Aalto et al. '5,312,296.

For claims 1-5 and 13, Aalto et al. teaches a fume hood in an enclosed room for removing smoke and gases comprising of a plenum/ trapezoidal box 23 having a top wall and a bottom wall and 2 side walls (the inside of the box is considered to be the inner periphery and the outside of the box is considered to be the outer periphery) and a support (the wall where reference number 19 is at) and a blower (vacuum means) (fig. 2 and col. 4, lines 6-23). The top and inner walls are joined at a bevel (according to Merriam Webster's Collegiate Dictionary 10th edition the word bevel means slant) and define an open facing in the top wall. The walls can also be constructed out of different widths and lengths (col. 3, lines 38-41). Please refer to figure (figure taken from fig. 2) on the next page.

Allowable Subject Matter

Claims 6-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
